PREFACE

In the absence of non-availability of proper systematised information regarding the different areas of research undertaken in the field of social sciences so far related to Uttarakhand, it was generally observed that planners, policy makers and individual researchers were spending a considerable time in searching for the work already undertaken in the field of their interest. The other drawback of such a lack of information is the obvious possibility of duplication of work. However, it should be pointed out quite clearly that a considerable amount of research work has been carried out in the social science field on various aspects of Uttarakhand. It is, therefore, essential that a sustained effort should be made to compile this information at one place together for the benefit of all. This particular effort of ours is a modest step in this direction. To carry out this work the Uttarakhand Development Department entrusted the responsibility to the Giri Institute of Development Studies, Lucknow. The details of research done on various aspects of Uttarakhand under the social science disciplines were compiled from the universities of Garhwal, Kumaun and Pant Nagar as well as the libraries of various research institutions. The bibliographical references include, published articles in books and journals, project reports and memoirs, books and doctoral thesis.

This study had been undertaken initially by Prof. B.K. Joshi and myself. However, owing to his ill-health Prof. Joshi had to proceed on leave and in his absence I had to supervise the entire work. I am however, thankful to him for the initial guidance which he had provided.

The study could be completed as a result of the cooperation of various organisations, universities and research institutions, and we wish to record our thanks to them. First of all we wish to express our thanks to the Uttarakhand Development Department, Lucknow for providing funds to meet the cost of the study. We also extend thanks to the librarians and other library staff of the Garhwal University Srinagar, Kumaun University Nainital and Almora

Campus, G.B. Pant University of Agriculture and Technology Pant Nagar and the G B Pant Institute of Environment and Development Almora.

The timely completion of the project was the result of fine team work displayed all those associated with the study. The collection of references is handled by Shri B.S. Koranga and Shri D.S. Nagarkoti. The efficient Word Processing of the report was handled by Ms Geeta Bisht. We wish to thank all of them for their efforts.
